## EDUCATION

Western Governors University

June- 2027

Bachelor's Degree in **Cloud and Network Engineering**

---

## CERTIFICATIONS

*AWS Certified Developer - Associate (DVA-C02)*

---

## RELEVANT EXPERIENCE

**Amazon**

Jan 2025 - Present

**Quality Assurance Associate - Arlington, VA**

- Developed and executed 150+ test cases in TestRail for router features including Wi-Fi, DHCP IP assignment, LTE failover, and firewall rules, achieving 100% coverage of functional requirements.
- Documented and tracked 40+ defects in Jira with detailed reproduction steps, logs, and screenshots, improving developer debugging efficiency by ~25%.
- Automated login verification using Python scripts via SSH and run connectivity and throughput tests, reducing manual regression testing time by 40% and increasing test consistency across builds.

**Scale AI / Outlier**

Feb 2024 - June 2024

**Software Developer AI Trainer - Remote**

- Created comprehensive prompts introducing software problems to AI models. Designed and tested 40 prompts weekly to improve model responses in Python, Java, and JavaScript.
  - Reviewed and evaluated AI outputs based on provided prompts and code examples, identifying and correcting 500+ code correctness, accuracy, and relevance issues in the generated responses.
  - Reviewed and validated peers' AI code evaluations for accuracy and consistency while collaborating to refine my own assessments, enhancing overall evaluation performance significantly.
- 

## PROJECTS | [View All](#)

**[Manga Website](#) | React, NodeJS, Express, MongoDB, AWS(S3 - CF), Google GCP**

[Github](#)

- Developed a full stack web application allowing users to read manga from my own manga collection using React for the frontend, NodeJS and Express for the backend, and MongoDB and AWS S3 for quick and efficient data storage.

**Custom Compiler | Racket, C**

[Github](#)

- Developed a simple compiler in Racket as the final project for my Design and Implementation of Programming Languages course, implementing parsing, semantic checking, and x86 assembly code generation.
- 

## SKILLS

- Programming Languages: **Python - Java - C - C++ - JavaScript - Swift**
- Frameworks & Libraries: **PyTorch - Django - Express - Node JS - React - Amazon AWS - MongoDB - SwiftUI**
- Tools & Technologies: **AWS - Git - Docker - Google GCP- VS Code - Jira - WireShark - HTML -CSS**
