EDUCATION

Western Governors University

Expected - June 2027

Bachelor's Degree in Cloud and Network Engineering | GPA: 3.55/4.00

Relevant Coursework:

- Data Structures and Algorithms
 - Computer Architecture
 - Operating Systems
-

RELEVANT EXPERIENCE

Amazon

Sept 2025 - Present

QA Associate - Arlington, Virginia

- Designed and implemented an **automated regression testing framework in Python** using SSH, Paramiko, and **pytest**, reducing manual regression testing time by 40%.
- Developed and executed 150+ **functional test cases in TestRail** covering Wi-Fi, DHCP IP assignment, LTE failover, and firewall rules, achieving 100% requirements coverage for new router firmware releases.
- Identified, documented, and tracked **40+ defects in Jira with detailed logs, packet captures, and reproduction steps**, improving developer debug time by ~25%.

Scale AI & Outlier

Feb 2024 - June 2024

Software Developer AI Trainer - Remote

- Wrote and tested **~40 coding prompts per week focused on Python, Java, and JavaScript** to evaluate how well the model handled common programming tasks.
 - Reviewed AI-generated code(**Python and Java**), **fixing over 500 issues** involving logic errors, incorrect syntax, or incomplete reasoning.
-

PROJECTS | [View All](#)

[AI Movie Recommendations](#) | Python, NodeJS, Express, MongoDB Atlas, AWS (EC2 - S3 - CF)

[Github](#)

- Created a full-stack AI-powered movie recommendation application using Python TF-IDF/cosine similarity, Node.js/Express, MongoDB Atlas, and AWS (EC2, S3, CloudFront). It delivers personalized recommendations with dynamic explanation metadata.

[Custom Compiler](#) | Racket, C

[Github](#)

- Developed a simple compiler in Racket as the final project for my Design and Implementation of Programming Languages course, implementing parsing, semantic checking, and x86 assembly code generation.

[Manga Website](#) | React, NodeJS, Express, MongoDB, AWS(S3 - CF), Google GCP

[Github](#)

- Developed a website allowing users to read from my own manga collection using React for the frontend, NodeJS and Express for the backend, and MongoDB and AWS S3 w/ Cloudfront for quick data retrieval.
-

SKILLS

- Programming Languages: Python - Java - C - JavaScript - Racket
- Frameworks: Django - Express - Node.js - React
- Cloud & DevOps: AWS (EC2, S3, CloudFront) - GCP - Docker
- Tools: Git - Docker - MongoDB - Jira- HTML -CSS
