EDUCATION

Western Governors University

Expected - June 2027

Bachelor's Degree in **Cloud and Network Engineering** | GPA: 3.55/4.00

RELEVANT EXPERIENCE

Amazon

Sept 2025 - Present

Quality Assurance Associate - Arlington, VA

- Designed and implemented an automated regression testing framework in Python using SSH, Paramiko, and pytest, reducing manual regression testing time by 40%.
- Developed and executed 150+ functional test cases in TestRail covering Wi-Fi, DHCP IP assignment, LTE failover, and firewall rules, achieving 100% requirements coverage for new router firmware releases.
- Identified, documented, and tracked 40+ defects in Jira with detailed logs, packet captures, and reproduction steps, improving developer debug time by ~25%.

Scale AI / Outlier

Feb 2024 - June 2024

Software Developer AI Trainer - Remote

- Wrote and tested ~40 coding prompts per week focused on Python, Java, and JavaScript to evaluate how well the model handled common programming tasks.
 - Reviewed AI-generated code and explanations, fixing over 500 issues involving logic errors, incorrect syntax, or incomplete reasoning.
-

PROJECTS | [View All](#)

[AI Movie Recommendations](#) | Python, Javascript, NodeJS, MongoDB Atlas, AWS (EC2 - S3 - CF) [Github](#)

- Implemented a Python TF-IDF/cosine similarity engine to generate personalized movie recommendations and explanation metadata.
- Built and deployed a Node.js/Express API on AWS (EC2, S3, CloudFront) with MongoDB Atlas for fast querying and retrieval.

Custom Compiler | Racket, C

[Github](#)

- Built a compiler with lexical analysis, parsing, semantic checks, and AST generation in Racket.
- Generated x86 assembly from validated AST nodes and produced runnable binaries through a custom code-generation pipeline.

[Manga Website](#) | Javascript, React, NodeJS, Express, MongoDB, AWS(S3 - CF), Google GCP

[Github](#)

- Developed a full-stack website allowing users to read from my own manga collection using React for the frontend, NodeJS and Express for the backend, and MongoDB and AWS S3 w/ Cloudfront for quick data retrieval.
-

SKILLS

- Programming Languages: **Python - JavaScript - C - Java - Racket**
- Frameworks & Libraries: **Pytest - Django - Node.js - Express - React - MongoDB - OpenCV - S3**
- Tools & Technologies: **AWS - Docker - Git - Google Cloud - Jira - Linux - HTML - CSS**
